# WE ARE NOT YOUR AVERAGE LIGHTING PARTNER

We are not your average anything.

We are here to help, to talk to, to instil confidence and to trust, through genuine support, knowledge, collaboration, and innovation.

We are here to provide the breathing space to empower you, enabling you to future-proof more easily, and more sustainably than ever before – while fostering the spirit of your ambition.

WE ARE INOVARA. WE ARE HERE.

# PREPARE TO BE ENLIGHTENED

**Welcome to Inovara Group. The culmination and new home of Collingwood Lighting, Nobile Italia, and Indigo Lighting. We bring together technically advanced skills, innovative backgrounds, sustainability-focused and forward-thinking minds, and data-driven lighting solutions to empower you and your business.**

With our support and expertise, you'll feel enabled to make confident, future-proof decisions that set new benchmarks in the development of sustainable properties within the residential, commercial, industrial, and landscape sectors.

But our commitment is far-reaching. Our global presence is indeed strong, but with our newly formed capabilities and scalability, we have the stability and long-term market

presence to grow yet further. Our focus is on you, your future, the sustainability of your projects, and our commitment in delivering an impeccably designed solution for your LED lighting integration.

To support markets where we do not have a dedicated product brand, we have launched Inovara International – our dedicated brand servicing regions such as the Middle East, ensuring access to the same high-quality lighting expertise and innovation. We can achieve all of that by being your global-thinking partner – a strategic partner, not just a product supplier.

**INTRODUCING THE STRENGTH OF INOVARA.  
LIGHTING INNOVATION.**

# A BRIEF HISTORY OF THE BRANDS THAT MADE IT ALL HAPPEN

Inovara Group, though new, has a familiar presence in the LED lighting space. We can attribute that to it being the product of three of Europe's leading and most respected lighting brands.

Sharing the intelligence, best practice and resources of Collingwood Lighting, Nobile Italia, and Indigo Lighting, Inovara Group stands uniquely placed to help the whole supply chain, from contractors to clients, face the challenges of today and pursue the opportunities of tomorrow.

Beyond Europe, Inovara International extends this expertise to global markets, ensuring a seamless lighting experience for customers in regions where we do not have a dedicated product brand presence.

**Collingwood Lighting, a UK-based business, has been a pioneer in the lighting industry ever since it was established back in 1961.**

A commitment to innovation, quality and sustainability, particularly in LED technology, catapulted a modest start-up into a significant market presence.

Collingwood's adaptation to market demands; catering to cultural and environmental requirements, developing strategic partnerships with influential stakeholders, and its dedication to introduce new technologies, has been instrumental in its success.

**Indigo Lighting, originally founded in 1989 under the name Soliban, has grown to become a leader in lighting innovation. Established as a Belgian lighting manufacturer in 2002, the company quickly gained a reputation for technical expertise and forward-thinking design.**

Its pioneering Technolight system set the foundation for future success, leading to an expanded product range and strong customer relationships.

Today, Indigo Lighting continues to deliver cutting-edge solutions, combining technical excellence with a deep understanding of the evolving needs of the lighting market.

**Founded in 1966 and headquartered in Rome, Nobile Italia, leads in design and LED technology in the Italian lighting market.**

Given Italy is known for its exquisite design credentials, this is praise indeed. Nobile manufactures and distributes world-class LED luminaires, with a clear market focus set squarely on 'premium'.

This strategy doesn't rely on beauty alone, and is supported by excellent service levels, well established customer relationships, and strong R&D capabilities.

# SMART THINKING AND A SMART APPROACH

## TECHNOLOGICAL INNOVATION

**With our leading-edge design expertise, innovative technology, and detailed understanding within the Commercial, Residential, Industrial, and Landscaping lighting sectors, we're able to provide the support and service you need to deliver a more energy efficient and aesthetically superior project.**

Inovara Group's consolidated expertise from our established lighting brands provides a solid foundation for innovative lighting solutions.

And with a robust sustainability and energy efficiency focus, we can comfortably align with your goals for 'future-proof' property investments.

## DATA-DRIVEN APPROACH

**As one collective business, we can connect ingenuity, problem solving, and initiative on a great scale to deliver the best we can. We're here to make everything simple, everything uncomplicated, and everything make sense.**

Inovara Group can provide detailed energy savings and operational efficiency data, a service that supports any decision-making process, particularly for those with an analytical focus to the job in hand.

And the company's global presence allows for comparative data across different markets, which can be particularly valuable if you're managing a diverse portfolio.

# THE SCA

## AND CAPABILITY TO DELIVER

With the culmination and collaboration of not one but multiple businesses within the Inovara Group, we have teams that specialise in all applications and can support you with whatever your project may be – from a single-room product to a multi-purpose development project for a more bespoke approach.

They all work together with you to design a system that fits your scheme exactly, ensure your project runs smoothly, and everything meets the necessary regulations. And because all our product businesses have a Global presence, we understand what's necessary to future-proof your property within your location.

# ALE

We have expert teams who'll help you at design stage to ensure you receive the maximum performance and value from your system selection. And with such a diverse range of LED lighting solutions, we can help tailor solutions across different property types, whilst offering phased implementation plans and integration roadmaps to avoid disruption whilst assuring long-term flexibility. So, you can plan with

confidence. Confidence too, because our consolidated structure as a significant pan-European brand provides peace of mind by choosing a long-term company that has stability and long-term market presence. A company that's committed to ongoing support and improvement. And a company that's with you as a strategic partner rather than just a product supplier.

**Sustainability is our focus – second only to our customers. That’s why Inovara products are developed to last longer, use less energy and provide the right light where it’s needed, helping to improve people’s quality of life. We understand that sustainability isn’t just about today – it’s about the future of all.**

We are therefore committed to continuously improving our operations, aligning our sustainability strategy and plans with the goals set out by the UN, and calculating our greenhouse gas emissions annually.

In 2023 for example, we reduced our emissions by 19%. We achieved this by sourcing 100% of our electricity from renewable sources, implementing energy efficient solutions in our buildings, and improving our vehicle fleet – resulting in a carbon saving of nearly 66,000 tonnes.

Our packaging too, is part of our sustainability programme, and is Forest Stewardship Council (FSC) approved, whilst plastic makes up just 3% of our total packaging weight. We’re introducing more modular products that are easier to repair and reuse, with all products carefully conceived to leverage technology for energy efficiency and longevity, whilst following eco-design principles.

And we are a business that is proud to promote ethical labour practices, support community development, and ensure fair treatment of employees, customers and suppliers.

# FOCUS ON SUSTAINA

BILITY

# SECTOR SUPPORT AND EXPERTISE

**With the combined expertise, design acumen, and innovative ethos of our product brands, Inovara can confidently provide the services Residential, Commercial, Industrial, and Landscaping customers need. We adopt a balanced approach that acknowledges both the benefits and potential challenges of implementing new lighting systems and can provide detailed energy savings and operational efficiency data, crucial for the analytical decision-making process.**

Our global presence allows for comparative data across different markets, which is valuable if you have diverse interests across the territory. And whether your challenges involve balancing the need for innovative, sustainable building solutions, or a future-proof smart building ecosystem, our time-served experience in technical advancements and sustainable product development will help overcome those challenges.

We're proud to possess the tools and ideas that facilitate and achieve exactly what's needed to enable you to meet the sustainable and future-proofing outcomes you plan for. Whilst we can help at any stage with your sustainable LED lighting integration, we recommend you plan your project with us from the very beginning. This will provide the best system required to ensure you receive the best possible value from start to finish.
